ership (the full version of				
e presentation included:				

February. The Chair confirmed that the key motivation was the ever earlier starting date for training and the need for players to be signed up members (and recorded as such on the Foireann system) to ensure eligibility to the Player Injury Fund for any injuries incurred. In addition, the Registrar confirmed that payment by direct debit continued to be an option which should minimise the financial burden at that time of year and reminded the floor that although later payment could still be accepted (by non players) access to the Down Draw ticket provided an additional incentive to sign up by the requested date. (ii) A question about the possibility of a separate rote for Premier Reserves to help increase numbers The Registrar outlined the administrative difficulties involved in creating additional membership options in a club of this side, the management of too many options would require a paid administrator which was a reason why we were in fact streamlining those already in place. The Chair invited a show of hands for a vote taken on both aspects of the subscription/membership proposal. In a show of hands, a clear majority approved the proposed 2024 subscription/membership rates for 2024 in a subsequent show of hands for the addition of a new additional student rate (for students studying outside of Ulster) a clear majority also approved this proposal. 6.0 Financial Statement (i) Whether consideration should be given to increasing income from gym membership given the relatively small proportion of adult members taking out membership, yet most of whom had use of the facility as external strength and conditioning coaches were used (unlike at underage level where an additional S&C payment was sought from members).		(i) A quary about any rick accorded with maying the membership payment deadline to the and of			
example ended for players to be signed up members (and recorded as such on the Foireann system) to ensure eligibility to the Player Injury Fund for any injuries incurred. In addition, the Registrar confirmed that payment by direct debit continued to be an option which should minimise the financial burden at that time of year and reminded the floor that although later payment could still be accepted (by non players) access to the Down Draw ticket provided an additional incentive to sign up by the requested date. (ii) A question about the possibility of a separate rate for Premier Reserves to help increase numbers The Registrar outlined the administrative difficulties involved in creating additional membership options in a club of this side, the management of too many options would require a paid administrator which was a reason why we were in fact streamlining those already in place. The Chair invited a show of hands for a vote taken on both aspects of the subscription/membership proposal. In a show of hands, a clear majority approved the proposed 2024 subscription/membership rates for 2024 In a subsequent show of hands for the addition of a new additional student rate (for students studying outside of Ulster) a clear majority also approved this proposal. The new subscription/membership rates were therefore deemed to have been adopted. 6.0 Financial Statement (i) Whether consideration should be given to increasing income from gym membership given the relatively small proportion of adult members taking out members). In response - The Treasurer reminded the floor of the need to keep a proportion of gym income aside for upgrades and maintenance (lalwing it to be self-finaninag). This will be less of an issue it is early years		,			
6.0 Financial Statement 6.0 Financial Statement (i) Whether consideration should be given to increasing income from gym embership given the relatively saw update based on the Financial Statement (the full version of which had been circulated to all membership to given the relatively set and update based on the Financial Statement (the full version of which had been circulated to all membership to given the relatively and update based on the Financial Statement (the full version of which had been circulated to all membership to given the relatively and update based on the Financial Statement (the full version of which had been circulated to all membership rates for 2024 in a subsequent show of hands for a vote taken on both aspects of the subscription/membership proposal. In a show of hands, a clear majority approved the proposed 2024 subscription/membership rates for 2024 in a subsequent show of hands for the addition of a new additional student rate (for students studying outside of Uster) a clear majority also approved this proposal. The new subscription/membership rates were therefore deemed to have been adopted. 6.0 Financial Statement (i) Whether consideration should be given to increasing income from gym membership given the relatively small proportion of adult members taking out membership. In response - The reasurer remained the floor of the need to keep a proportion of gym income aside for upgrades and maintenance (eals wrigh ad minitenance (allowing it to be self-financing). This will be less of an issue it is early vers when maintenance (eals wrigh ad miniten and that we will continue to focus on development priorities and would need to secure funding to enable this to happpen.					
at that time of year and reminded the floor that although later payment could still be accepted (by non players) access to the Down Draw ticket provided an additional incentive to sign up by the requested date. (ii) A question about the possibility of a separate rate for Premier Reserves to help increase numbers The Registrar outlined the administrative difficulties involved in creating additional membership options in a club of this side, the management of too many options would require a paid administrator which was a reason why we were in fact streamlining those already in place.
